

Office of the Minister of Chemicals & Fertilizers

Hon'ble Minister has desired that initiatives should be taken by the officers and staff of the Department to reduce use of plastic in office.

In this regard, to start with, he has suggested a few advisories:

Ban on supply and use of single use bottled water in the office of senior officers; staff and meetings; install drinking water dispensers in rooms of officers and staff, conference hall, common areas, etc.

No use of plastic cutlery (disposable glasses, cups, straws, etc.) in the meeting; replace it with steel cutlery.

Encourage officers and staff to use reusable bottles- glass steel, copper, etc.; Provide staff reusable mugs, glass/tumbler and bottles.

Secretary may kindly see for necessary action.
