

Workshop on drug design

Thiruvananthapuram, March 31

More than 50 researchers and scientists from around the country gained hands-on experience on drug design tools and simulation software at a national workshop that concluded here at the Indian Institute of Information Technology and Management-Kerala. The four-day workshop was co-organised by the Srinivasa Ramanujan Institute for Basic Science, Kottayam; Kerala Biotechnology Commission; and the Kerala State Council for Science Technology and Environment. Participants also got focused training in key digital tools for drug design, an official spokesperson said. OUR BUREAU
